PRODUCTIVITY TOOLS

TYPE!™

FINALLY! EVERYTHING WE KNOW ABOUT LEARNING AND EVERYTHING WE KNOW ABOUT COMPUTERS HAVE COME TOGETHER IN TYPE!

This is the first program to take full advantage of extensive research on how people learn to type, and combine that knowledge with the full potential of your computer. The result? You learn to type quickly, accurately and for keeps.

Starting out or starting over.

If you've never typed, or if you're almost an expert. Type! is the one. Because Type! teaches basics for beginners, speed and accuracy for intermediate typists, and concepts like chaining and overlapping for advanced typists. Type! adjusts to your skill level.

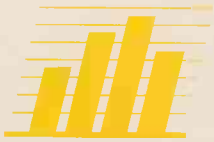
Type! works with most popular printers.

Basic training has never been this much fun.

By making keyboard basics interesting, Type! helps you build a strong foundation of basic skills that you'll never lose. Unlike some other learn-to-type programs, the exercises in Type! use real words and real sentences instead of boring random letter drills. And the more interesting the text the sooner drills turn into skills.

Special drills for special skills.

Skills for business. Skills for school. Skills for getting the most from your personal computer. Fact is, Type! uses the power of your computer not only to evaluate your work and recommend exercises, it can even create custom drills for your particular needs.



Continuous monitoring for continuous progress.

To improve and accelerate your progress, Type! includes the most advanced diagnostic capabilities available. Speed and accuracy are measured by finger, hand and letter so you know exactly what you're doing right *and* wrong. And what to do about it!

Type!-Athlon. A game that works while you play.

We're serious about wanting you to learn. But not too serious to have a little fun. Type!-Athlon is an action-packed way to beef up your skills because while you play, the advanced diagnostic system is hard at work.

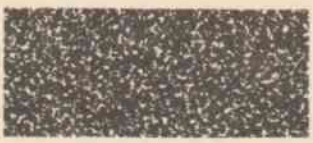
C'mon. Don't Be Bashful.



Your opinion is very important to us. You see, we don't put these cards in every package. Only a few. So please accept our invitation to become a Brøderbund "Software Consultant." We really appreciate it when you take the time to tell us what you think.

Why should you bother? Two reasons:

1. **It's a special opportunity to make your voice heard** by our top designers and programmers—your comments and suggestions can help us do a better job of producing the kind of software you're looking for.

2. You'll become eligible for a special **monthly drawing for free software,** exclusively for our software consultants.

So, please return the card—just tape or staple it closed, stamp it, and drop it in the mail. Thank you.

Sincerely,

Don L. Daglow
Executive Publisher

P.S. Don't forget to mail in the "FREE SOFTWARE" registration card, too. That way, you'll have **two** chances to win.

PLEASE wait a few days until you've had a chance to get a feel for the software before filling out this card. Thanks.
